

What the System Remembers: A Missing Voice

系统记住了什么：缺席的声音

English Story

The missing voice arrived **as** an **email** from a **remote terminal** in a room nobody visited. **I am** the person whose **address** is in your **release**, it said. **I** never gave permission for the **storage** of my data, not once, and not in any form. There was no **error** in the **technical** sense; the **error** was in the **mechanism**. **As** a **scientific** matter, the **execution** of the **instruction** had been exact, and that was the problem.

The **platform** had three menus, four packets of settings, and a **translation** of the consent form that nobody could read. A **circuit** of old machines, a **tube** of glue, and a **sink** full of cables: the lab had the look of an **explosion** in a **chemistry** set. The **generator** hummed, and the **electronics** on the shelf were covered in dust.

The **interaction** between the **input** and the output had never been tested with a real person. A **disc** of old backups, a **magnet** beside the **storage**, and a **prompt** on the screen asking for a **resolution**: the whole apparatus had one weakness, and **it** was the human at the end of **it**.

There was a **fragmentation** of responsibility: nobody owned the **address** list, and nobody could explain the **absorption** of personal data into a marketing **outlet**. The **interpreter** of the rules, a **cracker** of small puzzles, and the king of the local **podcast** all said the same thing: a service that cannot be explained cannot be consented to.

Compatible systems, **telecommunications**, and a **mechanism** for withdrawal: those were the three things the person asked for. The **force** of the request was quiet, and the hope behind **it** was still there, waiting quietly. **It** was a **scientific** problem, and the science was not in the **machinery**; not one **atom** of the data had been taken with **relaxation**. The computer, the cell, the source, and the energy were all in the same attempt to build a program that technology could not quietly rewrite. Over the next billion operations, the club would have to **pick** one: the convenience of the system, or the consent of the person inside **it**.

那个缺席的声音以一封电子邮件的形式到来，发自一间没人去过的房间里的远程终端。我是你发布信息里的那个地址，它说。我从未允许你存储我的数据。从技术意义上说没有错误；错误在于机制。从科学的角度看，那条指令被精确地执行了——而问题正在这里。

这个平台有三个菜单、四包设置，以及一份没人读得懂的同意书译文。一圈旧机器、一管胶水，以及一个装满线缆的水槽：实验室看起来像一套化学实验用具里发生了爆炸。发电机嗡嗡响着，架子上的电子元件落满了灰。

输入与输出之间的交互，从未与一个真实的人测试过。一张旧备份的光盘、存储旁的一块磁铁，以及屏幕上要求给出解决方案的提示：整台设备只有一个弱点，而它就是末端的那个人。

责任是碎片化的：没有人拥有那份地址名单，也没有人能解释个人数据是如何被吸收进一个营销渠道的。规则的译解者、一个擅长破解小谜题的人，以及当地播客之王，都说了同一件事：一项无法被解释的服务，是无法被同意接受的。

兼容的系统、电信，以及一套撤回的机制：这是那个人要求的三件事。这个请求的力量是安静的，而它背后的希望仍在。这是一个科学问题，而科学不在机器里；没有一个原子的数据是在放松状态下取得的。电脑、电池、来源和能量，全都在同一个尝试里——去建立一个技术无法悄悄改写的程序。在接下来的十亿次操作中，俱乐部必须做出选择：系统的便利，还是其中那个人的同意。
